

Product code: O203a

Description: Lane change driver for Ninco / Carrera

New product / replacement: New

- Boards to be installed on Ninco and Carrera lane exchangers, for lane change actuation with oXigen digital system.
- Compatible with Scalextric SSD cars.
- Chip replaces the original circuit when track works as oXigen. Switches with numbers from 1 to 4 modify the lane exchanger configuration according to the track, Ninco or Carrera, and the working mode: lane change up, down, or both, as a consequence of pressing the SCP buttons with arrows. SSD compatibility mode.
- Can be used together with Ninco / Carrera circuit as lane changer driver, in order to keep the compatibility with original system.

*Instructions are available on Slot.it website*
